

**ELODIE EERIEWOOD HAS ALWAYS BEEN DIFFERENT.** She can see magical waves called auras, which no one she knows can detect. Maybe there's nobody else like her out there.

**FLYNN RENWOOD HAS ALWAYS BEEN ABLE TO FIGURE THINGS OUT,** but she has an ability of her own, and it makes absolutely no sense. It's not something that can be explained or reasoned around, and *definitely* not anything normal.

Best friends from birth, twelve-year-olds Elodie and Flynn have worked hard to disguise their differences, even from one another. But when they fall through a portal to an enchanting, terrifying planet called Twilight Spectrum, their tightly guarded secrets begin to unravel.

Disoriented and desperate to return home, the two embark on a journey through kingdoms of ice, sand, mountains, and monsters with the help of new friends and a loyal, cat-like companion. Soon they find themselves racing against a malevolent sorceress to gain possession of the Ember Stone — a magical jewel that could determine both their fate and the fate of the planet. The deeper they venture into the heart of Twilight Spectrum, the stronger and more trusting they discover they can be, but will that be enough to save themselves, the world, and their only chance of getting home?

This manuscript was published through SOCIETY OF YOUNG INKLINGS' Fresh Ink imprint. Fresh Ink is an introductory publishing program for youth writers who have completed a full draft of a novel. This program introduces revision techniques which the youth author then applies to their completed draft. The views of the author are their own and do not reflect the views of Society of Young Inklings.
